GRĂDINA BOTANICĂ „ANASTASIE FĂTU” IAŞI

Grădina Botanică a Universității „Alexandru Ioan Cuza” din Iași a fost înființată la 10 august 1856, fiind prima grădină botanică universitară românească și, în același timp, cea mai mare din țară, ocupând o suprafață de 87,95 ha, unică prin diversitatea colecțiilor științifice și subsecția destinată persoanelor cu dizabilități de vedere, unde speciile de plante, bogate în uleiuri eterice, sunt prevăzute cu explicații în alfabetul Braille.

Organizarea grădinii botanice pe Dealul Copou a fost aprobată cu prilejul aniversării Centenarului Universității, dar amenajarea peisageră a început în anul 1963, fiind continuată și dezvoltată permanent.

Cadrul natural oferă condiții excelente pentru cercetarea și conservarea fondului genetic de plante indigene și exotice, educație și recreere. Coordonatele geografice pentru acest amplasament sunt $47^{\circ}11'11.0''$ latitudine N și $27^{\circ}33'21.8''$ longitudine E, unde altitudinea variază între 55 și 150 m, iar temperatura medie anuală este 10°C , respectiv precipitațiile medii anuale sunt 580 mm.

Colecțiile științifice de plante reprezintă materialul biologic pentru desfășurarea activităților didactice cu studenții și elevii, respectiv de cercetare în domeniul fitodiversității, conservarea *ex situ* a plantelor și de educație ecologică. Aspectele referitoare la conservarea speciilor native și a soiurilor tradiționale, a plantelor rare și a celor afectate de supraexploatare sunt tratate ca prioritare.

Tematica științifică este specifică pentru fiecare din cele 10 secții: *Complexul de Sere, Sistemerică, Flora și Vegetația României, Ornamentală, Fitogeografică, Dendrologică, Biologică, Plante Utile, Rosarium și Silvostepa Moldovei*.

Expozițiile florale anuale sau evenimentele culturale, prezintă un interes deosebit pentru grupuri organizate de turiști din țară sau din străinătate.

Din anul 2000 este membru fondator al *Asociației Grădinilor Botanice din România*, membru în *Rețeaua Internațională pentru Schimburi de Plante* (2009), respectiv în *Asociația Grădinilor Botanice din Grupul Universităților Coimbra* (2011).

THE BOTANICAL GARDEN “ANASTASIE FĂTU” OF IAȘI

The Botanical Garden of the "Alexandru Ioan Cuza" University from Iasi, founded on August 10, 1856, is the first Romanian university botanical garden and, at the same time, the largest in the country, occupying an area of 87.95 ha. It is a unique institution due to the diversity of the scientific collections and due to the sub-section intended for people with visual disabilities, where the plant species, rich in essential oils, are provided with explanations in the Braille alphabet.

The organization of the botanical garden on Copou Hill was approved on the occasion of the University Centenary, but the landscaping began in 1963, being continued and developed permanently.

The natural environment offers excellent conditions for research and conservation of the genetic pool of indigenous and exotic plants, for education and recreation. The geographical coordinates for this location are 47°11'11.0" N latitude and 27°33'21.8" E longitude, while the altitude varies between 55 and 150 m, the average annual temperature is 10 °C, and the average annual precipitation is approx. 580 mm.

The scientific collections of plants represent the biological material for carrying out didactic activities with students and pupils, and also for researches in the field of plant diversity, for *ex situ* conservation and ecological education. Aspects related to the conservation of native species and traditional varieties, of rare plants and of those affected by overexploitation are treated as a priority.

The scientific theme is specific for each of the 10 sections: the *Greenhouse Complex*, *Systematic*, the *Flora and Vegetation of Romania*, *Ornamental*, *Phytogeographical*, *Dendrological*, *Biological*, *Useful Plants*, *Rosarium* and the *Silvosteppe of Moldova*.

Traditional annual flower exhibitions or various cultural events are of particular interest to organized groups of tourists from the country or abroad.

Since 2000 it is a founding member of the Association of Botanical Gardens in Romania, since 2009 a member of the International Network for Plant Exchanges, and since 2011 of the Association of Botanical Gardens of the Coimbra University Group.

Grădina Botanică „Anastasie Fătu” din Iași a aderat la IPEN, *Rețeaua Internațională de Schimb de Plante*, în anul 2009. În acest context, materialul oferit pentru schimb în *Index Seminum et Sporarum* respectă codul de conduită impus de IPEN.

Codul IPEN, asociat fiecărui taxon din acest catalog, are forma generală: XX-0-IAGB-11112W, unde:

- primele două litere corespund codului țării de origine a speciei date (XX indică faptul că originea taxonului este necunoscută);
- cifra următoare indică prezență (1) sau absență (0) unor restricții de transfer;
- literele următoare precizează codul grădinii noastre botanice (în conformitate cu BGCI);
- următoarele cifre împreună cu ultima literă constituie codul intern de acces al speciei:
 - primele patru cifre indică anul de înregistrare a speciei (XXXX indică an de înregistrare necunoscut);
 - următoarea cifră reprezintă codul de localizare în grădină (numerotarea secțiilor Grădinii Botanice este redată mai jos);
- litera indică originea speciei date: W = plantă spontană; Z = plantă spontană adusă în cultură; G = plantă cultivată.

Secțiile Grădinii Botanice și coordonatorii acestora:

1. Secția Biologică – biolog dr. Lidia ADUMITRESEI
2. Secția Dendrologică – biolog dr. Ciprian BÎRSAN
3. Secția Complexul de Sere – biolog dr. Camelia IFRIM
4. Secția Ornamentală – inger Mihaela POPA
5. Secția Ornamentală – colecția de crizanteme – biolog dr. Ana COJOCARIU
6. Secția Flora și Vegetația României – biolog dr. Constantin MARDARI
7. Secția Rosarium – inger Mihaela MIHALACHE
8. Secția Sistematică – biolog dr. Adrian OPREA
9. Secția Plante Utile – biolog dr. Cristiana Virginia PETRE
10. Secția Fitogeografică – inger Iuliana GAȚU
11. Secția Silvostepa Moldovei – biolog dr. Constantin MARDARI

“Anastasie Fătu” Botanical Garden of Iași had in 2009 been registered as a member of IPEN, the *International Plant Exchange Network*. In this context, the material proposed for exchange in the *Index Seminum et Sporarum* intends to comply with the specific code of conduct required by IPEN.

The specific IPEN number associated to each taxon proposed for exchange, has the following structure: XX-0-IAGB-11112W

- the first two positions reffer to the country of origin of the taxon (XX indicates an unknown origin of the taxa);
- the next position indicates restrictions of transfer (1 – restriction, 0 – no restriction);
- the next letters indicate our garden code (according to BGCI);
- the next five digits, together with the last letter, indicate the internal identification number:
 - the first four digits represent the registration year of the species (XXXX indicates an unknown registration year);
 - the next position shows the place of the species in the botanic garden sections (the within numbered sections in the botanic garden are given below);
- the last letter indicated the origin of the species, as follows: W = wild plant; Z = wild plant in culture; G = a cultivated plant species.

The Sections of the Botanical Garden, along with their leaders:

1. Biological Section – PhD biologist Lidia ADUMITRESEI
2. Dendrological Section – PhD biologist Ciprian BÎRSAN
3. Greenhouses Complex – PhD biologist Camelia IFRIM
4. Ornamental Section – engineer Mihaela POPA
5. Ornamental Section – *Chrysanthemum* collection – PhD biologist Ana COJOCARIU
6. Romanian Flora and Vegetation Section – PhD biologist Constantin MARDARI
7. Rose Garden – engineer Mihaela MIHALACHE
8. Systematical Section – PhD biologist Adrian OPREA
9. Useful Plants Section – PhD biologist Cristiana Virginia PETRE
10. Phytogeographic Section – engineer Iuliana GATU
11. The Moldavia Sylvosteppe Section – PhD biologist Constantin MARDARI

PLANT MATERIALS SUPPLY AGREEMENT

In response to the International Convention on Biological Diversity (Rio de Janeiro, 1992), the **Botanical Garden “Anastasie Fătu” of University “Alexandru Ioan Cuza” Iași** supplies the seeds requested on the following conditions:

1. The seeds are used for the common good in the areas of research, conservation, education and the development of botanical gardens;
2. If the recipient seeks to commercialise either the genetic material, its products or research derived from it, then written permission must be obtained from *The Director* of the Botanical Garden of Iași;
3. The genetic material, its products or resources derived from it should not be passed onto a third party without written permission from *The Director* of the Botanical Garden of Iași;
4. The research publications resulting from the use of the genetic material should acknowledge the Botanical Garden of Iași as the supplier.

I agree with the conditions of supply of seeds.
